Cautionary Statement

This document contains confidential and proprietary information belonging to RE Royalties Ltd. (collectively “RER” or the “Company”). The facts and information provided in this presentation are for informational purposes only. Users should not rely on information contained herein for any purpose other than for gaining general knowledge of RE Royalties.

This presentation includes forward-looking information and forward-looking statements (collectively, “forward-looking information”) with respect to the Company. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases including, but not limited to, “expects”, “does not expect”, “is expected”, “anticipates”, “does not anticipate”, “plans”, “estimates”, “believes”, “does not believe” or “intends”, or stating that certain actions, events or results may, could, would, might or will be taken, occur or be achieved) are not statements of historical fact and may be “forward-looking information”. This information represents predictions and actual events or results may differ materially. Forward-looking information may relate to the Company’s future outlook and anticipated events or results and may include statements regarding the Company’s financial results, future financial position, expected growth of cash flows, business strategy, budgets, projected costs, projected capital expenditures, taxes, plans, objectives, industry trends and growth opportunities. Forward-looking information contained in this presentation is based on certain assumptions regarding expected growth, results of operations, performance, industry trends and growth opportunities. While management considers these assumptions to be reasonable, based on information available, they may prove to be incorrect. Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. These risks, uncertainties and other factors include, but are not limited to risks associated with general economic conditions; adverse industry events; marketing costs; loss of markets; future legislative and regulatory developments involving the renewable energy industry; inability to access sufficient capital from internal and external sources, and/or inability to access sufficient capital on favorable terms; the renewable energy industry generally, income tax and regulatory matters; the ability of the Company to implement its business strategies including expansion plans; competition; currency and interest rate fluctuations, and the other risks discussed in the Company’s filings on SEDAR+ (www.sedarplus.ca). The foregoing factors are not intended to be exhaustive. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results to differ from those anticipated, estimated or intended. Forward-looking statements contained herein are made as of the date hereof and the Company and its directors, officers and employees disclaim any obligation to update any forward-looking statements, whether as a result of new information, future events or results or otherwise. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, you should not place undue reliance on forward-looking statements due to the inherent uncertainty therein. All forward-looking information is expressly qualified in its entirety by this cautionary statement. Forward-looking information and other information contained herein concerning management’s general expectations concerning the renewable energy industry are based on estimates prepared by management using data from publicly available industry sources as well as from market research and industry analysis and on assumptions based on data and knowledge of this industry which management believes to be reasonable. However, this data is inherently imprecise, although generally indicative of relative market positions, market shares and performance characteristics. While management is not aware of any misstatements regarding any industry data or comparables presented herein, industry data and comparables are subject to change based on various factors. The Company has not independently verified any of this data from independent third-party sources.

This information is not intended to be and should not be construed in any way as part of an offering or solicitation of securities. No securities commission or other regulatory authority in Canada, the United States or any other country or jurisdiction has in any way passed upon the information contained in these pages. Although the Company believes the facts and information contained in the pages of this presentation to be correct and attempts to keep this information as current as possible, the Company does not warrant or make any representations as to the accuracy, validity or completeness of any facts or information contained in these pages. Unless otherwise specified, no user has permission to copy, redistribute, reproduce or republish, in any form, any information found in the pages of this presentation. Any user who, without authorization, re-transmits, copies or modifies any trademarks may violate federal or common law trademark and/or copywriter law, and may be subject to legal action.

Our Vision for a Greener Tomorrow

Our objective is to acquire a portfolio of growing, long-term, stable, and diversified investments that will provide our investors with long-term, sustainable cash flows.

Pioneering Renewable Energy Royalty Financing

RE Royalties is a prominent pioneer in renewable energy financing with a strong brand reputation.

- First to apply royalty financing in renewables
- Unique model filled a financing gap
- First-mover advantage in a novel niche
- Maintaining pioneer status as others follow

RERoyalties.com

2018

The first publicly traded pure-play renewable energy royalty company upon its listing in 2018

RE Royalties is the Global Energy Solution

RERoyalties.com

CLIMATE CHANGE IS ACCELERATING

- Own a diversified portfolio of income producing renewable and sustainable energy investments. Solar, wind, hydro, RNG, energy storage and efficiency
- Primarily in Canada and USA (80%+)

STRONG TRACK RECORD AND PERFORMANCE

- \$82M+ invested across 27 transactions, 130+ projects
- 16%+ IRR since inception and 1.54x MOIC across 27 transactions
- 41% of existing pipeline from repeat or existing clients

STRONG GROWTH AND OPPORTUNITIES

- 29% revenue CAGR from 2019-2025, driven by recurring royalty streams
- Globe and Mail Canada's Top Growing Companies (2021 & 2024)

IMPACT FOCUSED COMPANY

- Meets United Nations Sustainable Development Goals
- Received Dark Green Rating from S&P Global
- Canada Clean50 Winner (2019 and 2022)

Why Invest in RE Royalties?

01

CAPITAL PROTECTION

- Secured loans
- Asset backed
- Diversified portfolio

02

GROWTH

- Increased demand for renewable energy financing

03

IMPACT

- Offset over 400,000 tonnes of carbon emissions per year from our portfolio

A Large and Growing Market Opportunity

Record breaking deployment: 90% of new energy capacity added in the U.S. in 2025 came from clean sources, including wind, solar, or batteries, a sign of huge growth in RE Royalties' addressable market.

- In 2025 alone, the U.S. added 27 GW of new utility scale solar generation and another 6.3 GW of small scale solar.
- Utility scale solar alone saw a 34.5% increase in installed capacity from 2024-2025. Both distributed and utility-scale solar projects are abundant, creating significant demand for financing.
- In 2025 the U.S. installed 6.3 GW of new wind capacity, representing a 22% increase from the 5.2 GW installed in 2024.
- Battery storage is emerging as a high-growth segment which saw U.S. battery installations rise 39% from 2024 to 2025.

Canada's Pipeline: Robust and Growing

Canada's Pipeline

Canada's combined wind, solar, and storage capacity grew 56% from 2020 to 2025, reaching 25 GW.

Successful Projects

24 GW of new renewable projects announced or in development across Canada will come online in the next 10 years.

8 GW of utility-scale wind, solar, and storage will be connected to the grid by 2029.

Installed Capacity

Total installed capacity of wind, solar, and storage in Canada is expected to increase by 32% by 2029 and double by 2035.

Canada Requires Massive Capital Injections to Build Renewables

This new development will require:

CanREA and Dunsky's 2025 market outlook report anticipates at least 59 GW of new projects to come online by 2035.

Electricity Supply

Increase the share of wind and solar in Canada's total electricity supply from 10% to 21-29% in 2035.

Annual Investment

Represent an annual investment of \$14-\$20 billion.

Investment Opportunity

Create a total investment opportunity of \$143-\$205 billion in 10 years.

RERoyalties.com

Heightened Focus: Energy Security

Recent geopolitical instability in the Middle East has reinforced the strategic importance of domestic, diversified energy supply, accelerating policy and capital support for renewable generation as governments and utilities prioritize resilient, locally sourced power.

Environmental Impact

The North American clean energy finance market reached \$120B in 2025 (+5.8% YoY), with meaningful growth from mid-market and emerging developers.

Economic Advantages

U.S. developers have safe-harbored 170 GW of wind and solar capacity, ensuring a multi-year deployment runway, much of it driven by mid-market players racing to meet policy deadlines.

[RERoyalties.com](https://www.RERoyalties.com)

Market Size + Growth Momentum

Small and mid-sized developers are driving an increasing share of renewable growth across North America but remain largely underserved by traditional finance.

- Distributed solar accounted for 15% of all new U.S. power capacity additions in 2025, with small and medium developers playing an outsized role, as residential and community projects reached record installation levels.

Sources: Crux Climate, PV Magazine, Business Renewables Centre, Climate Tech Canada, American Clean Power

Policy Tailwinds Opening the Door for Smaller Developers

POLICY FRAMEWORK

Canada has adopted a policy framework supportive of accelerated renewable energy development, including the introduction of a 30% federal Clean Technology Tax Credit available through 2034, which is driving increased investment by small and medium-sized developers in wind, solar, and energy storage.

PROCUREMENT MODELS

Provinces such as Nova Scotia are stepping up with new corporate procurement models and community-based project frameworks gaining traction among smaller developers.

FEDERAL TAX CREDITS

Federal tax credits in both countries, the US ITC and Canada's Clean Technology Tax Credit, narrow the economics gap between smaller developers and large-scale incumbents.

RERoyalties.com

The Global Energy Surging Demand

Growing Demand Is Pulling Mid-Market Developers In

- Canada's top 100 companies need an additional 7.7 GW of renewables by 2040; corporate procurement demand ideally suited to mid-market developers.
- Surging demand from AI, data centers, electrification, and manufacturing is expanding the addressable market across both countries.

Sources: Crux Climate, PV Magazine, Business Renewables Centre, Climate Tech Canada, American Clean Power

[RERoyalties.com](https://www.RERoyalties.com)

7.7 GW
Needed by 2040

A Clear Financing Gap Exists

TRADITIONAL FINANCING

Traditional financing favors large, established companies; mid-market developers struggle to secure non-dilutive capital.

US LENDERS

U.S. lenders demand higher coverage ratios and equity contributions, disproportionately disadvantaging smaller players.

CANADIAN CLIMATE TECH

Canadian climate tech funding fell 13% in 2025, with a pronounced late-stage funding gap.

CAPITAL CHALLENGES

Interconnection backlogs, permitting delays, supply chain disruptions, and FEOC rules amplify the capital challenge.

RE Royalties Opportunity

RE Royalties is uniquely positioned for growth, and you can get involved as an investor.

01

Revenue-based financing market projected to more than triple: \$8.4B → \$28.6B by 2034.

02

Bridge lending is the fastest-growing U.S. clean energy finance segment at \$25B in 2025.

03

Mid-market developers are favored by procurement programs, corporate buyers, and communities, yet underserved by traditional lenders, RE Royalties fills that gap.

PROVEN HISTORY

RE Royalties
repeatable model
generates high
returns and is now
scaling into
profitability

Capital Recycling

This allows for the same capital to generate multiple recurring revenue streams as it is continuously repaid and lent.

Proven History of Strong Portfolio Returns with Significant Cash Yield

Proven, high yielding portfolio: RE Royalties has deployed \$82M+ across 27 closed transactions on 130+ projects, generating a since inception weighted IRR of 16%, and a 1.54x MOIC.

RE Royalties borrows at 6–9% and invests at an average of IRR of 18%+

Capital-recycling engine: Short-term secured loans (six months to three years) are repaid and redeployed, while each transaction also creates long-term royalties (15-20 years).
